

Electricity

Licence

Electricity Generation Licence

AGL Hydro Partnership and Hallett 5 Pty Ltd

AGL HP1 Pty Ltd (ACN 080 429 901);
AGL HP2 Pty Ltd (ACN 080 810 546);
AGL HP3 Pty Ltd (ACN 080 735 815)
(as partners in the AGL Hydro Partnership ABN 86 076 691 481)

and

Hallett 5 Pty Ltd (ACN 154 281160)

Hallett Stage 5 (Bluff) Wind Farm

Issued by the Essential Services Commission on 24 September 2010.
Last varied by the Essential Services Commission on 8 August 2019.

Variation history

Amendment number	Variation date	Reason	
ESCOSA01	25 September 2012	Amendment to Annexure 1	
ESCOSA02	8 August 2019	Licence varied to reflect amendments to the Act and update outdated references.	

1 Definitions and interpretation

- 1.1 Words appearing in bold like **this** are defined in part 1 of the Schedule.
- 1.2 This licence must be interpreted in accordance with the rules set out in part 2 of the Schedule.

2 Grant of licence

- 2.1 The **licensee** is licensed under Part 3 of the **Act**, and subject to the conditions set out in this licence, to generate electricity:
- (a) using the electricity generating plant as specified in Annexure 1; and
 - (b) at the location described in Annexure 2.

3 Term

- 3.1 This licence commences on the date it is issued and continues until:
- (a) it is surrendered by the **licensee** under section 29 of the **Act**; or
 - (b) it is suspended or cancelled by the **Commission** under section 37 of the **Act**.

4 Access

- 4.1 The **licensee** must:
- (a) in accordance with, and to the extent required by, the **Electricity Transmission Code**, grant to an **electricity entity** holding a **transmission licence** or a **distribution licence**, rights to use, or have access to, those parts of the **licensee's** electricity generating plant that are interconnected or interface with the **electricity entity's** assets for the purpose of ensuring the proper integrated operation of the South Australian power system and the proper conduct of the operations authorised by that **electricity entity's transmission licence** or **distribution licence**; and
 - (b) in the absence of agreement as to the terms on which such rights are to be granted, comply with a determination of the **Commission** as to those terms.

5 Dispute resolution

- 5.1 A dispute relating to the granting of rights to use or have access to the inter-connecting assets of the **licensee's** electricity generating plant referred to in clause 4 shall be resolved in accordance with any applicable **industry code** developed by the **Commission** for the resolution of disputes.
- 5.2 Clause 5.1 does not apply to the extent the dispute is subject to resolution in accordance with or under the **National Electricity Rules**.

6 Compliance with codes

- 6.1 The **licensee** must:
- (a) comply with all applicable provisions of the **Electricity Transmission Code**, the **Electricity Distribution Code** and the **Electricity Metering Code**;

- (b) comply with all applicable provisions of any other industry code or rule made by the Commission from time to time; and
- (c) notify the Commission if it commits a material breach of the Electricity Transmission Code, the Electricity Distribution Code or the Electricity Metering Code within 3 days after becoming aware of that breach.

7 Safety, reliability, maintenance and technical management plan

7.1 The licensee must:

- (a) prepare, maintain and periodically revise a safety, reliability, maintenance and technical management plan dealing with matters prescribed by regulation;
- (b) obtain the approval of the Technical Regulator:
 - (i) to the plan (prior to commencement of the operation of the electricity generating plant to which the plan relates); and
 - (ii) to any revision of the plan;
- (c) comply with the plan as approved from time to time in accordance with clause 7.1(b); and
- (d) undertake audits of its compliance with the plan from time to time and report the results of those audits to the Technical Regulator, in the form required by the Technical Regulator.

8 National electricity market

8.1 Subject to clause 8.2 and clause 8.3, the licensee must hold and comply with the conditions of any registration required under the National Electricity Rules granted by AEMO (or the person responsible for the granting of such registrations under the National Electricity Law or the National Electricity Rules) at all times that such registration is required for the operations authorised by this licence.

8.2 The licensee must be registered as a market generator under the National Electricity Rules.

8.3 The licensee must not apply to be classified as a non-scheduled generator under the National Electricity Rules.

9 Ancillary services

9.1 The licensee must ensure that it has installed, and keeps operational, metering suitable for the purposes of clause 3.15.6A(h) of the National Electricity Rules to allow the individual contribution of the electricity generating plant to the aggregate deviation in frequency of the power system to be assessed within each trading interval of the National Electricity Market.

9.2 The licensee must comply with requirements imposed under the National Electricity Rules from time to time in relation to ancillary services arrangements.

10 Fault ride through capability

10.1 Each generating unit of the electricity generating plant operated by the licensee must be capable of continuous uninterrupted operation during the occurrence of a normal voltage

fluctuation caused by a **transmission network** fault involving a single phase or two phase to ground condition with a loading level after the fault is cleared that is at, or reasonably about, the loading level immediately prior to the fault.

- 10.2 For the purposes of clause 10.1, normal voltage fluctuation means voltage remaining within a band for 3 minutes, 10 seconds and 175 milliseconds following a fault, with the band having:
- (a) an upper boundary of 110% of nominal voltage at all times; and
 - (b) a lower boundary of 0% of nominal voltage for the first 175 milliseconds during the fault, 80% of nominal voltage for the first 10 seconds after the fault is cleared and 90% of nominal voltage for the next 3 minutes.

11 Reactive power capability

- 11.1 At full rated power output the electricity generating plant operated by the **licensee** must be capable of:
- (a) absorbing reactive power of 0.395 times that power output; and
 - (b) delivering reactive power of 0.395 times that power output.
- 11.2 At generation levels below full rated output the electricity generating plant operated by the **licensee** must be capable of:
- (a) absorbing reactive power at a level at least pro-rata to that of full output; and
 - (b) delivering reactive power at a level at least pro-rata to that of full output.
- 11.3 The electricity generating plant operated by the **licensee** must at all times be capable of providing:
- (a) at least 50 percent of the reactive power capabilities referred to in clause 11.1 and clause 11.2 on a dynamically variable basis; and
 - (b) the balance of any reactive power capability referred to in clause 11.1 and clause 11.2 not supplied dynamically on a static basis.
- 11.4 The reactive power capability of the electricity generating plant operated by the **licensee** must be capable of control by a fast-acting, continuously variable, voltage control system which is able to receive a voltage set point.
- 11.5 The electricity generating plant operated by the **licensee** must be capable of operating to a power factor set by the **network service provider** from time to time.

12 Wind forecasting

- 12.1 The **licensee** must, on request, provide to the **Commission** or **AEMO**, accurate and verifiable wind energy forecasting data and temperature data, appropriately constructed wind energy conversion models, documents and other information concerning the operation of the electricity generating plant which the **licensee** is authorised by this licence to operate.
- 12.2 Any data, models, documents and information requested under this clause must be provided in the manner and form and within the time frame specified by the **Commission** or **AEMO**.
- 12.3 The **licensee** must cooperate with the development and implementation of wind energy forecasting systems for use in the National Electricity Market and must provide timely, accurate, and verifiable information for this purpose.

13 Information to AEMO

- 13.1 The electricity generating plant operated by the licensee must be:
- (a) able to meet the requirements specified by AEMO from time to time for the real time supply of data on active and reactive power, wind speed and wind direction; and
 - (b) capable of remote control by AEMO.
- 13.2 The electricity generating plant operated by the licensee must meet the information provision requirements specified in clause 13.1(a) for at least 3 hours following total loss of supply at the connection point.
- 13.3 The licensee must provide AEMO with forecasts of expected generation output for the purposes of incorporation into pre-dispatch, medium term and long term PASA data.

14 System controller and AEMO

- 14.1 The licensee must, following a request from AEMO, provide to AEMO such documents and information as AEMO may reasonably require for the performance of its functions.
- 14.2 The Licensee must comply with any directions given to it by the System Controller.

15 Information to the Commission

- 15.1 The licensee must, from time to time, provide to the Commission, in a manner and form determined by the Commission:
- (a) details of the licensee's financial, technical and other capacity to continue the operations authorised by this licence; and
 - (b) such other information as the Commission may require from time to time.
- 15.2 The licensee must notify the Commission of any changes to its officers, and (if applicable) major shareholders, within 30 days of that change.

16 Operational and compliance audits

- 16.1 The licensee must undertake periodic audits of the operations authorised by this licence and of its compliance with its obligations under this licence and any applicable Codes in accordance with the requirements of Energy Industry Guideline No. 4 issued by the Commission.
- 16.2 The licensee must also conduct any further audits at a frequency and in manner approved by the Commission.
- 16.3 The results of audits conducted under this clause must be reported to the Commission in a manner approved by the Commission.
- 16.4 The Commission may require the licensee to use an independent expert approved by the Commission to conduct audits under this clause.
- 16.5 The Commission may require the costs of using an independent expert approved by the Commission to conduct audits under this clause to be met by the Licensee.

17 Confidentiality

- 17.1 The licensee must, unless otherwise required by law, this licence, an industry code, or the National Electricity Rules, comply with any rules made by the Commission from time to time relating to the use of information acquired by the licensee in the course of operating the business authorised by this licence.

18 Community service

- 18.1 The licensee must comply with the requirements of any scheme approved and funded by the Minister for the provision by the State of customer concessions or the performance of community service obligations by the electricity entities.

19 Compatibility

- 19.1 The licensee must not do anything to its electricity generating plant affecting the compatibility of its electricity generating plant with any distribution network or transmission network so as to prejudice public safety or the security of the power system of which the electricity generating plant forms a part.

20 Insurance

- 20.1 The licensee must undertake and maintain during the term of this licence insurance against liability for causing bush fires.
- 20.2 The licensee must provide to the Commission a certificate of the insurer or the insurance broker by whom the insurance was arranged (in a form acceptable to the Commission) to the effect that such insurance is adequate and appropriate, given the nature of the licensee's activities conducted under this licence and the risks associated with those activities.

21 Compliance with laws

- 21.1 The licensee must comply with all applicable laws including, but not limited to, any technical or safety requirements or standards contained in regulations made under the Act.

22 Switching Manual

- 22.1 The licensee must:
- (a) prepare and maintain an internal switching manual in accordance with the regulations; and
 - (b) comply with any other requirements relating to switching prescribed in the regulations.

23 Variation

- 23.1 This licence may only be varied in accordance with section 27 of the Act.

24 Transfer

- 24.1 This licence may only be transferred in accordance with section 28 of the Act.

This licence was issued by the Commission on 24 September 2010 and last varied by the Commission on 8 August 2019.

Date

Schedule: Definitions and Interpretation

Part 1 - Definitions

In this licence:

Act means the Electricity Act 1996 (SA);

AEMO means the Australian Energy Market Operator Limited (ACN 072 010 327);

business day means a day on which banks are open for general banking business in Adelaide, excluding a Saturday or Sunday;

Commission means the Essential Services Commission established under the ESC Act;

distribution licence means a licence to operate a **distribution network** granted under Part 3 of the Act;

distribution network has the meaning given to that term under the Act;

Electricity Distribution Code means the code of that name made by the Commission under section 28 of the ESC Act which regulates connections to a **distribution network** and the supply of electricity by distributors;

electricity entity means a person who has been granted a licence under Part 3 of the Act to carry on operations in the electricity supply industry;

Electricity Metering Code means the code of that name made by the Commission under section 28 of the ESC Act which regulates the installation, maintenance and testing of meters;

Electricity Transmission Code means the code of that name made by the Commission under section 28 of the ESC Act;

ESC Act means the Essential Services Commission Act 2002 (SA);

generator means a holder of a licence to generate electricity granted under Part 3 of the Act;

industry code means any code made by the Commission under section 28 of the ESC Act from time to time;

Licensee means each of: AGL HP1 Pty Ltd (ACN 080 429 901), AGL HP2 Pty Ltd (ACN 080 810 546) and AGL HP3 Pty Ltd (ACN 080 735 815) (as partners in the AGL Hydro Partnership ABN 86 076 691 481) and Hallett 5 Pty Ltd (ACN 154 281 160);

National Electricity Law means the National Electricity Law referred to in the National Electricity (South Australia) Act 1996 (SA);

National Electricity Rules has the meaning given to that term in the National Electricity Law;

network service provider means ElectraNet Pty Ltd (ACN 094 482 416) ;

regulation means a regulation made under the Act;

rule means any rule issued by the Commission under section 28 of the ESC Act;

System Controller means the person licensed under Part 3 of the Act to exercise system control over a power system;

Technical Regulator means the person holding the office of Technical Regulator under Part 2 of the Act;

transmission licence means a licence to operate a **transmission network** granted under Part 3 of the Act; and

transmission network has the meaning given to that term under the Act.

Part 2 - Interpretation

In this licence, unless the context otherwise requires:

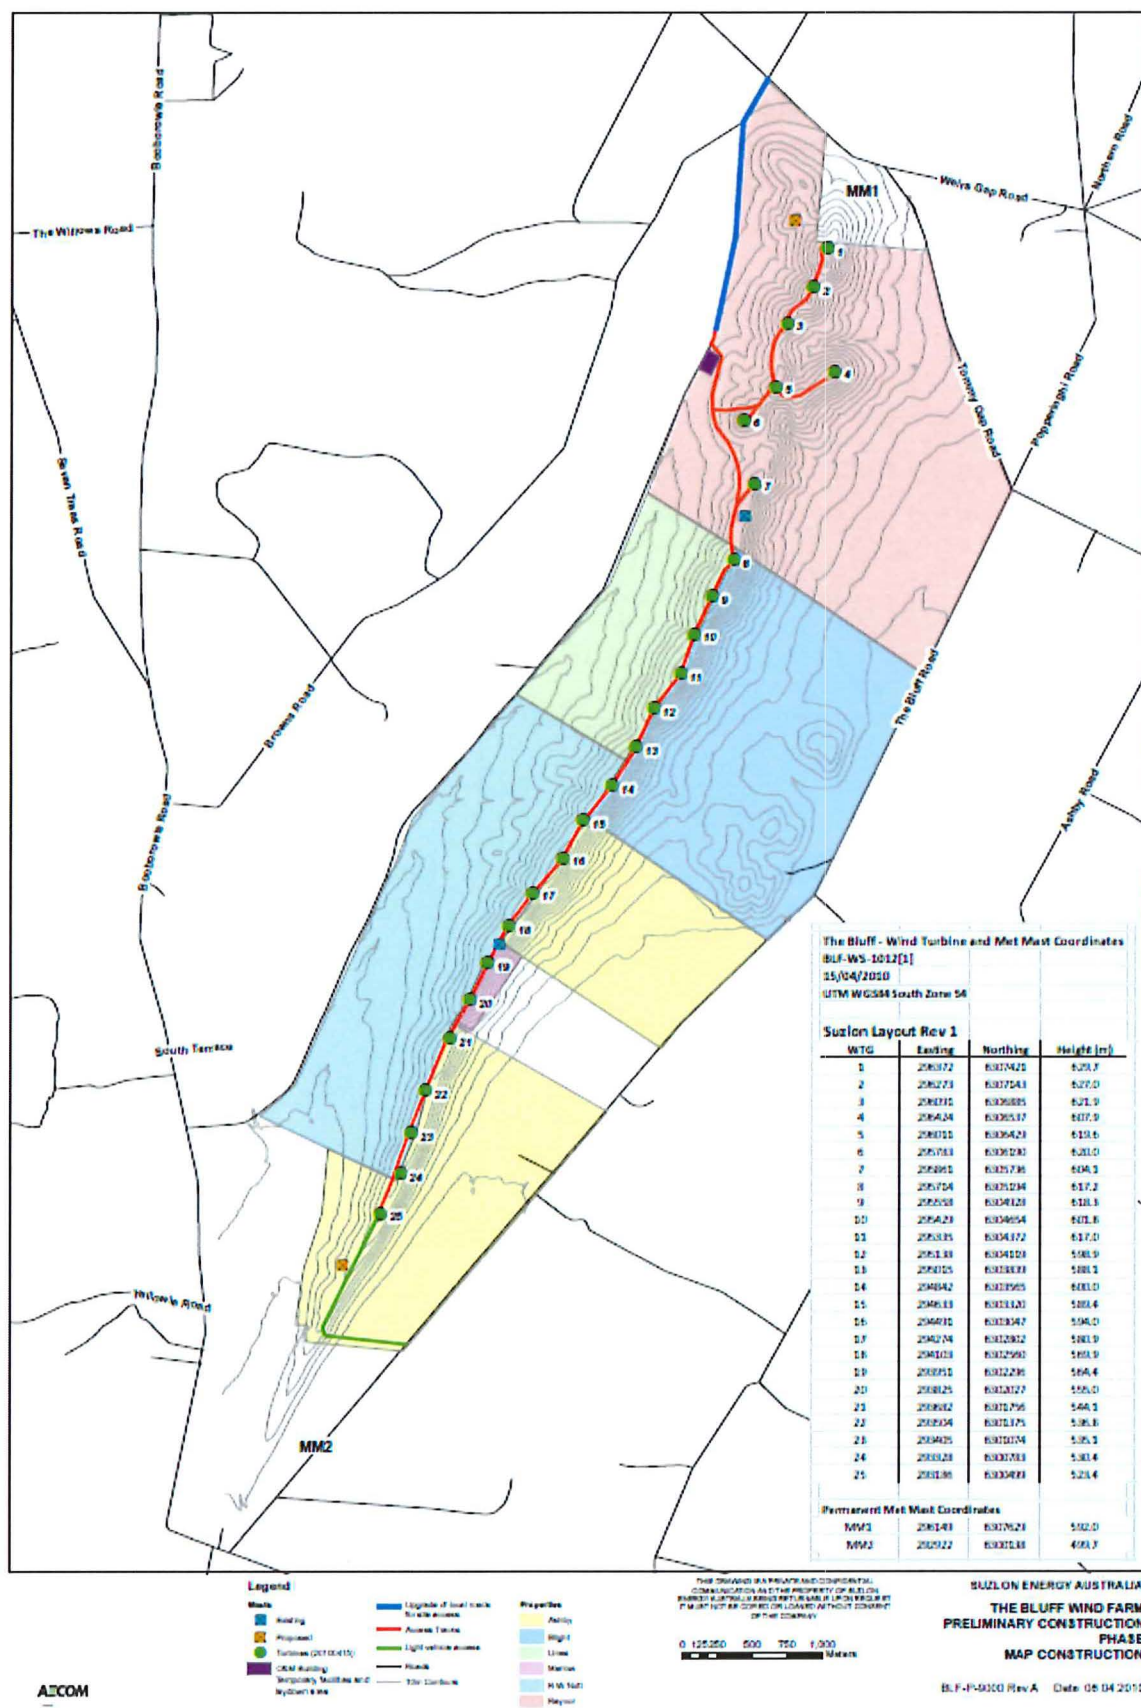

- (a) headings are for convenience only and do not affect the interpretation of this licence;
- (b) words importing the singular include the plural and vice versa;
- (c) words importing a gender include any gender;
- (d) an expression importing a natural person includes any company, partnership, trust, joint venture, association, corporation or other body corporate and any governmental agency;
- (e) a reference to any statute, regulation, proclamation, order in council, ordinance or by-law includes all statutes, regulations, proclamations, orders in council, ordinances or by-laws varying, consolidating, re-enacting, extending or replacing them and a reference to a statute includes all regulations, proclamations, orders in council, ordinances, by-laws and determinations issued under that statute;
- (f) a reference to a document or a provision of a document includes an amendment or supplement to, or replacement or novation of, that document or that provision of that document;
- (g) an event which is required under this licence to occur on or by a stipulated day which is not a **business day** may occur on or by the next **business day**.

ANNEXURE

Annexure 1

1. Up to 25 Suzlon 2.1MW wind turbine electricity generators (24 Suzlon s88 turbines and 1 Suzlon s97 turbine) with a total combined maximum output capacity of 52.5MW for the entire electricity generating plant operated by the licensee at Hallett Hill Stage 5 (Bluff) wind farm.

Annexure 2 - Location of electricity generating plant
