INFORMATION FOR APPLICANTS BEFORE FILLING OUT THIS FORM

Purpose of this form

This form is to be completed by persons making an application to the Essential Services Commission of South Australia (the **Commission**) for the issue of a licence to provide a retail service (or undertake any other activity for which a licence is required by the regulations) in the water industry in South Australia.

The Commission may consider joint applications from two or more persons who wish to hold a licence jointly. Persons making joint applications must ensure that each of the applicants completes a separate application form together with a covering letter explaining that the application is for a licence to be jointly held.

Basis for this form

Section 19(1) of the *Water Industry Act 2012* (the **Act**) provides that an application for the issue of a licence must be made to the Commission in a form approved by the Commission. This is the form approved by the Commission.

Use of this form and applicant's responsibility

For the purpose of this application form, a reference to the term "Officer" include the applicant's directors and secretary, and/or other persons who make or participate in making decisions that affect a substantial part of the business of the applicant (e.g. Chief Executive Officer, Chief Financial Officer, General Manager etc.).

Applicants should list the information requested in the spaces provided in this form and enclose additional information when required. Applicants must take all reasonable steps to ensure the information provided in the application form is complete, true and correct and are required to make a declaration to that effect. Failure to disclose information or misrepresent any matter relevant to such information may result in a licence not being issued or in the suspension or cancellation of a licence at a later time.

Applicants are responsible for providing the Commission with current, accurate and relevant information. This will ensure that the application is processed promptly and without delay. All applications are assessed on a case-by-case basis. If insufficient information is provided with an application, the Commission will request additional information to be submitted before the application is considered further. This may cause delays in the assessment of the application.

Application form for the issue of a licence by the Essential Services Commission of SA under the Water Industry Act 2012

Application Form

Prior reading

It is essential that licence applicants read the Commission's Water Bulletin – "*Licensing Arrangements for the Water Industry*" before they fill out this form. This Bulletin is available on the Commission's website www.escosa.sa.gov.au under water/licensing. Applicants should also familiarise themselves with the regulatory obligations set out in the Act and the Water Retail Code that will apply to entities that provide retail services.

Licence conditions

Section 25 of the Act requires the Commission to impose certain conditions in licences. The Commission strongly recommends that applicants review these mandatory conditions. Applicants must be familiar with the relevant conditions and be confident that they can comply with the conditions. The Commission will have regard to the scale and nature of the operations undertaken by an applicant in imposing these conditions and will be available to consult with an applicant in this regard.

Consultation and Confidentiality

The Commission will consult with relevant government, industry and consumer groups in the conduct of its licensing functions through a public consultation process. Consequently, applications and/or supporting information will be made available on the Commission's website and in hard copy from the Commission's office for this purpose.

If applicants believe that they are providing confidential information when completing this form they should write "this information is confidential" after any such information. It is the applicant's responsibility to ensure this is clearly highlighted on the form. Applicants should also provide a 'non-confidential' version of the form capable of publication on the Commission's website.

The Commission will use information supplied in applications and in support of applications in accordance with the requirements of Part 5 of the *Essential Services Commission Act 2002*. Applicants claiming confidentiality are encouraged to familiarise themselves with Part 5. Applicants should note that the Commission may be required to disclose confidential information in some circumstances.

Application form for the issue of a licence by the Essential Services Commission of SA under the Water Industry Act 2012
Application Form

How to lodge an application

Applicants should send their completed application form in writing and electronically.

In writing to: Essential Services Commission of SA
GPO Box 2605
Adelaide SA 5001

Electronically to: licensing@escosa.sa.gov.au

Application fee

Applicants must also enclose an application fee (which is to be set by the Treasurer) with their application. This fee must be received by the Commission in cleared funds before it can commence assessing an application.

Annual licence fee

Holding a licence incurs an annual licence fee. The licence fees are set by the Treasurer, however, are collected by the Commission. At annual intervals, the Commission, on behalf of the Department of Treasury and Finance, will send to each licensee an invoice for the relevant annual licence fee. Licence fees are to be paid on receipt of an invoice via one of the payment options set out in the invoice.

A licence cannot be issued until the first annual licence fee has been paid.

1. THE APPLICANT

Applicants must answer all questions in this section.

1.1. Identity of applicant

State the full name of the applicant. The applicant should be the person/entity that will be providing a retail service (e.g. retail or distribution operations etc). The Commission can also consider joint applications from two or more persons who wish to jointly hold the licence. Joint applicants should each complete an application form, and submit their application forms at the same time, with a covering letter explaining that a joint application is being made.

Name: BHP Billiton Olympic Dam Corporation Pty Ltd

1.2. Legal identity of applicant

Provide information about the applicant, (i.e. whether the applicant is a natural person, proprietary limited or public company, partnership or local government body etc). If the applicant is a body corporate, please also state the jurisdiction in which the applicant is registered, and the applicant's ABN/ACN.

Proprietary Limited

1.3. Address and Contact Details of applicant

Business Address:

BHP Billiton Olympic Dam, 1 Olympic Way, Roxby Downs.....

State: South Australia **Post Code:** 5725.....

Postal Address (if different to Business Address):

PO Box 150

State: South Australia **Post Code:** 5725.....

Telephone: 86718888

Facsimile:

E-mail: See Contact Person Details

Application form for the issue of a licence by the Essential Services Commission of SA under
the Water Industry Act 2012
Application Form

1.4. Contact Person on behalf of applicant

The full name, title and contact details of a person to whom the Commission can direct enquiries and correspondence about the application.

Full Name: Donald Crawford

Title: Manager Non Process Infrastructure Operations (Acting)

Business Address:

BHP Billiton Olympic Dam, 1 Olympic Way, Roxby Downs.....

State: South Australia **Post Code:** 5725

Postal Address (if different to above):

PO Box 150, Roxby Downs.....

State: South Australia **Post Code:** 5725

Telephone: 8671 8888

Facsimile: N/A

E-mail: Don.Crawford@bhpbilliton.com

1.5. Contact person for licence fees

The full name or title of the person to whom the Commission can direct enquiries and correspondence about licence fees.

Full Name: Donald Crawford

Title: Manager Non Process Infrastructure Operations (Acting)

Business Address:

BHP Billiton Olympic Dam, 1 Olympic Way, Roxby Downs.....

State: South Australia **Post Code:** 5725

Postal Address (if different to above):

PO Box 150, Roxby Downs.....

State: South Australia **Post Code:** 5725

Telephone: 8671 8888

Facsimile: N/A

E-mail: Don.Crawford@bhpbilliton.com

2. THE LICENCE

Applicants must answer all questions in this section.

2.1. *A detailed description of the retail services for which a licence is sought*

For example:

Water: drinking- residential and/or non-residential;

Water: non-drinking – residential and/or non-residential;

Sewerage: residential and/or non-residential; and

Sewerage – trade waste – non-residential.

Applicants should provide detailed information in respect of where the retail services will be provided and to whom (i.e. type and number of customers)

BHP Billiton Olympic Dam Water Operations provide potable water supply to the Roxby Downs and Andamooka townships for council operated distribution as well as supply to the Olympic Village and the adjacent Heavy Industrial Area. While the majority of connections are within the Heavy Industrial Area, our largest client for external distribution is the Roxby Downs Council, who supplies residents with potable water.

Currently, Olympic Dam has approximately 60 retail water connections to our supply network.
.....
.....
.....
.....

2.2. *Date from which Licence is sought*

If the applicant seeks to have the licence issued by a certain date, provide this date. Please note that the Commission does not undertake to issue the licence by this date. Applicants should usually allow the Commission a minimum of eight weeks to consider an application, as a public consultation period of several weeks forms part of the Commission's consideration of licence applications.

April 2013

3. SUITABILITY OF APPLICANT TO HOLD A LICENCE

Applicants must answer all questions in this section.

3.1. *Standard of honesty and integrity shown by applicant*

In deciding whether the applicant is a suitable person to hold a licence, the Commission may:

- consider the applicant's previous commercial and other dealings, and*
- the standard of honesty and integrity shown in those dealings.*

Please provide information that will assist the Commission in its consideration of this matter. If the applicant:

- has been found guilty of any criminal offence,*
- has been successfully prosecuted under any Territory, State or Commonwealth legislation (such as the Australian Securities and Investments Commission Act 2001 or the Competition and Consumer Act 2010); or*
- has been the subject of disciplinary action,*
- details of such matters must be disclosed. Failure to disclose such information or misrepresent any matter relevant to such information may result in the cancellation of a licence.*

The Commission may use the service of an external expert to assist with the assessment of the applicant's standard of honesty and integrity.

BHP Billiton Olympic Dam Corporation Pty Ltd has had no findings of criminal guilt.

BHP Billiton and its employees operate utilising a set of Charter Values (Integrity, Simplicity, Performance, Accountability, Respect and Sustainability). Within these values, a focus on Integrity and Accountability result in an overriding business goal of doing what we say we will do while accepting responsibility and delivering on our commitments.....

Our charter may be found at:

<http://www.bhpbilliton.com/home/aboutus/ourcompany/Pages/Charter.aspx>

3.2. *Standard of honesty and integrity shown by officers and major shareholders (if relevant) of the applicant*

Applicants should address responses to this question in the same manner as 3.1 above.

All officers of the applicant are governed by the same set of charter values as the company as a whole (see above).....

3.3. *Names and addresses of the officers of applicant*

State the names and addresses of the officers of the applicant. "Officers" of the applicant include the applicant's directors and secretary, or other persons who make or participate in making decisions that affect a substantial part of the business or operations of the applicant that will be licensed.

Full Name: Daniel Rowlands

Date of Birth: 03/05/1979

Office Held: Senior Manager Non Process Infrastructure.....

Business Address:

BHP Billiton Olympic Dam, 1 Olympic Way, Roxby Downs.....

State: South Australia **Post Code:** 5725.....

Full Name: Donald Crawford

Date of Birth: 05/05/1953

Office Held: Manager Non Process Infrastructure Operations

Business Address:

BHP Billiton Olympic Dam, 1 Olympic Way, Roxby Downs.....

State: South Australia **Post Code:** 5725.....

Full Name: Jamie Millard

Date of Birth: 27/06/1973

Office Held: Superintendent Non Process Infrastructure Operations

Business Address:

BHP Billiton Olympic Dam, 1 Olympic Way, Roxby Downs.....

State: South Australia **Post Code:** 5725.....

(attach additional pages if necessary)

3.4. *Names and addresses of major shareholders of
applicant (not relevant for local council applicants)*

State the full names and addresses of the major shareholders of the applicant.

**BHP Billiton Olympic Dam Corporation Pty Ltd is part of the BHP Billiton group
of companies and is a wholly owned subsidiary of BHP Billiton Limited**

3.5. *Details of the group members (not relevant for
local council applicants)*

This is information about entities controlled by the applicant, or by the ultimate parent entity of
the applicant (if applicable).

**BHP Billiton is a global mining entity which owns and operates large, long term
mining assets across a variety of minerals and resources.**

.....

3.6. *Additional information*

Please answer the following questions.

- Is the applicant a resident of, or does it have permanent establishment in, Australia? If
the answer to this question is "no", please provide further details.

Yes.....

- Is the applicant under external administration (as defined in the Corporations Act 2001)
or under a similar form of administration under any laws applicable to it in any
jurisdiction? If the answer to this question is "yes", please provide further details.

No.....

- Is the applicant immune from suit in respect of the obligations under the Water Industry
Act 2012? If the answer to this question is "yes", please provide further details.

No.....

- Is the applicant capable of being sued in its own name in a court of Australia? If the
answer to this question is "no", please provide further details

Yes.....

3.7. Financial resources available to the applicant

Provide information about the financial resources available to the applicant which provides sufficient evidence of the current and ongoing financial capacity of the applicant to effectively provide the relevant retail services (e.g. bank guarantees, credit history and business continuity arrangements).

If the applicant is a company, please enclose a copy of the audited (and Board approved) profit and loss statement and balance sheet for the previous two financial years, including the director's report and the audit opinion. If the applicant is a subsidiary company, please also provide a copy of the audited profit and loss statement and balance sheet of the applicant's parent company for the previous two financial years.

If an applicant is a local council, please enclose a copy of the audited profit and loss statement and balance sheet for the previous two financial years.

Applicants should also submit copies of business plans which detail the strategic direction of the applicant, including its objectives, identified opportunities in the market place and forecast results.

.....
<http://www.bhpbilliton.com/home/investors/reports/Pages/Roll%20up%20Pages/BHP-Billiton-Results-for-the-Year-Ended-30-June-2012.aspx>.....
.....
.....

3.8. Human resources available to the applicant

Provide information about the human resources available to the applicant, for example, the number of employees and the experience of these employees in providing the services for which the licence is sought. If the applicant will employ contractor/s to assist with the licensed operations, please provide the name of that contractor/s, and details about the experience of the contractor/s in such operations and details of the processes in place to ensure the contractor/s will comply with the regulatory obligations imposed by the licence.

The Non Process Infrastructure Water Operations organisation chart consists of one (1) BHP Billiton Supervisor Water Operations with five (5) BHP Billiton specialists. Reporting to the Supervisor are nine (9) contractor technicians. Currently, technicians are sourced from skilled labour hire companies. Positions are filled after an extensive review process consisting of comparison of multiple résumés and interviews of potential candidates put forward by contracting companies or BHP Billiton internal applications to ensure that personnel hired are skilled to a level suitable for the position they are being considered for.

Reporting and management of Water Operations Issues are communicated through management, consisting of the Superintendent Infrastructure

**Operations, Manager Non Process Infrastructure Operations and the Senior
Manager Non Process Infrastructure**

3.9. Technical resources available to the applicant

Applicants are asked to provide details about the availability of technical resources to be used in carrying out the services for which a licence is sought. The information should include details about the technically qualified staff available to the applicant and (if relevant) of experience gained in similar operations.

Applicants must also provide sufficient details of the systems and processes to be used to market and/or communicate with customers, to provide bills, to follow up payments and process customer move-ins and move-outs and deal with customer enquiries and complaints.

Water Operations personnel utilise electronic systems in the operation and maintenance of the water distribution network. Electronic monitoring system CITECT allows for real time reporting of flow, pressure and infrastructure status as well as remote operation of pumps and valves should they be connected to the system. As an addition and backup to the CITECT system, there are a number of manually read flow meters which are used in the process of reporting water usages.

Production balance software is utilised to reconcile water usages and provide daily reports of “as used” distribution throughout our supply network. This process is audited annually as part of KPMG Audits on site. Previously, GE Betz and GHD have also performed audits of water infrastructure and systems.

Daily samples, analysed locally, combined with samples delivered to the Australian Water Quality Centre allow us to maintain control over water chemistry, ensuring that water delivered to customers is within guidelines set out in the Australian Drinking Water Licencing.

Qualifications currently available to the department through employed personnel include multiple recipients of Certificate 3 in Water Management, Plumber Qualifications, GE Betz Reverse Osmosis Operator Competencies, University Certificates in Information Technology, Microbiology and Geoscience and University Bachelor Degrees in Chemistry and Civil Engineering. In conjunction with this is a variety of backgrounds of trade experience in relevant and/or similar industrial settings.

.....

.....

.....

.....

.....

.....

3.10. Contracts

Applicants must provide reasonable evidence that they are able to meet reasonably foreseeable obligations under contracts for the sale and supply of water or the sale or supply of sewerage services (or both) as the case may be. Such contracts would include contracts whereby the applicant is reliant on a supply of water or specific sewerage service from a third party which is intends to on sell to its customers.

As stipulated by the Roxby Downs Indenture Ratification Act (1982) Olympic Dam must supply the Roxby Downs Township with an adequate supply of water into the Town Storage Dam. To date, there have been ZERO instances of adverse impacts to the town water supply, attesting to the ability of Olympic Dam Water Operations to provide adequate supply. Supporting this is electronic monitoring software with an inbuilt capacity to provide alarms should set levels occur within storages (both high and low). These alarms in turn have the potential to trigger internal escalation processes. A copy of the Indenture Ratification Act can be accessed through the Legislation SA website: www.legislation.sa.gov.au

3.11. Suitable and appropriate infrastructure

The Commission may not issue a licence unless it is satisfied that the infrastructure to be used in connection with the relevant service is appropriate for the purposes for which it will be used. Applicants are therefore asked to provide a detailed description of the infrastructure that will be utilised by the applicant in providing the retail services for which the licence is sought and verify that the infrastructure has been (or will be) developed in accordance with relevant Australian Industry Codes and Australian Standards with reference to technical specifications or reports.

If an applicant does not own the infrastructure to be used in delivering the relevant retail services, the applicant must provide information regarding the appropriateness of that infrastructure and of the binding arrangements that are (or will be) in place with the owner of the infrastructure in regards to the use of the infrastructure.

BHP Billiton Olympic Dam Corporation Pty Ltd owns and operates a reverse osmosis Desalination Plant which supplies potable water to the mine site, Olympic Village and surrounding industrial estate and the Roxby Downs and Andamooka councils. The Reverse Osmosis plant was designed for this purpose by Permutit, now a subsidiary USFilter, in conjunction with Kinhill.

The plant is fed by a raw water supply extracted from two wellfields drawing from the Great Artesian Basin. Water is fed into a pipeline extending up to 220km to the north of the Olympic Dam mine site and is then transferred by a series of pump stations to the plant.

Within the plant, raw water is subject to pre-filtration, cooling and various forms of chemical dosing allowing high levels of control over bacterial counts

and pH. Water is then further filtered before passing through the reverse osmosis plant, where high pressures across the RO train membranes result in the creation of high quality potable water.

After the RO process, potable water is transferred to one of two storages on site, consisting of the 60ML and 80 ML potable dams. Each dam is a fully lined and covered storage which can be utilised as a source of supply to Town 10ML dam via a pump station comprised of two (2) line priming pumps and two (2) feed pumps. These pump sets operate on a continuous duty/standby setting which allows for maintenance to be carried out, if required, without the need to cease supply.

This pump station transfers water throughout the Heavy Industrial Estate and to the Roxby Downs Township, while the potable water line feeding the Desalination Plant offices is also utilised to supply the Andamooka Township.

Throughout the supply and distribution network there are multiple sample points which are used for frequent water sampling and testing, both by internal analytical laboratories and the Australian Water Quality Centre. Compliance to all relevant Australian statutory guidelines and standards is maintained as a minimum through appropriate maintenance plans in conjunction with regular internal and external inspection to verify the state of the system.

3.12. Risk management

Provide confirmation and reasonable evidence that the applicant's management has identified the risks associated with the retail services it intends to provide and has established, utilises and relies upon risk management systems and processes which are adequate, accurate and current to address those risks. A copy of the applicant's risk management strategy should be submitted.

We believe that, because of the international scope of our operations and the industries in which we are engaged, there are numerous factors which may have an effect on our results and operations. In order to minimise the potential for any impact on our ability to produce goods or services (for the case of this application, an adequate, reliable and healthy drinking water supply) the Olympic Dam Corporation Pty Ltd maintains a register of risks associated with production which is regularly reviewed for the adequacy of controls in place and residual risk after consideration of preventative controls and mitigating measures. It should be noted that these risk events also include the potential for injury or loss of life, and mitigating controls aim to prevent injury as well as maintain supply.

The risks identified are managed through a meticulous process involving analysis of probable root causes of failure modes or problem initiators leading to the creation of multiple avenue prevention strategies consisting of varying combinations of regular inspection, condition monitoring, preventative and statutory maintenance in conjunction with regular reporting through multiple

levels of management to ensure a transparency within the company as to the operating level of our vital infrastructure items. This allows us to actively coordinate across multiple disciplines to ensure we maintain a high level of reliability within our distribution system.

It should be noted that a key indicator of BHP Billiton Olympic Dam's ability to effectively manage and mitigate risks associated with water distribution is our current standing of not having adversely impacted the town water supply during our tenure at Roxby Downs.

3.13. *Licences held by the applicant in other Australian jurisdictions*

If the applicant holds, or has previously held, a retail services licence or equivalent in other Australian jurisdictions please provide details. If a licence previously held has been suspended or cancelled, please provide details.

The applicant has not previously held a water services retail licence

.....
.....
.....

3.14. *Previous unsuccessful licence applications in other Australian jurisdictions*

Please state whether the applicant has applied for a water retail licence or equivalent in another Australian jurisdiction and not been issued with a licence, and provide relevant details.

The applicant has had no unsuccessful licence applications to date

.....

3.15. *Licences held by associates of the applicant*

If an associate of the applicant (within the meaning of the Corporations Act) holds a water retail licence in South Australia or in other Australian jurisdictions, please provide details.

No other parties within Olympic Dam Corporation Pty Ltd hold a water retail licence.

.....

3.16. *Compliance program*

Applicants are required to submit a copy of their Compliance Program which details what compliance systems the applicant has (or will have) in place and a description of how these

Application form for the issue of a licence by the Essential Services Commission of SA under the Water Industry Act 2012
Application Form

systems will ensure compliance with the applicable regulatory obligations imposed by a licence and the Water Retail Code. The Commission expects that a Compliance Program will, as a minimum, document:

- the obligations that will apply to the applicant;*
- the processes that are (or will be) in place to ensure the applicant's compliance with obligations;*
- details on how compliance is monitored;*
- details of how non-compliance will be reported and rectified; and*
- details of any internal audit programs in place that review (or will review) the effectiveness of the Compliance Program from time to time.*

BHP Billiton Olympic Dam Corporation Pty Ltd is obliged to supply water as per the Roxby Downs Indenture Ratification Act in conjunction with Federal and South Australian water quality legislation.

Maintenance, Operation and Testing in accordance with, or exceeding, legislative requirements and Australian Standards is implemented to ensure compliance to all water and system quality guidelines. .

Supporting BHP Billiton internal assessments of water quality are samples taken over a variety of time periods which are forwarded to the Australian Water Quality Centre which performs analysis and provides reports on the chemical composition of the water.

Any internal report indicating a water chemical composition exceeding acceptable levels triggers a re-testing procedure including resampling from the infringing sample points, which are then delivered to the Australian Water Quality Centre for a full chemical analysis to confirm if non-compliance has occurred.

The distribution system and all associated maintenance, operation and reporting protocols are frequently audited by internal inspectors as well as historical audits performed by expert water quality consulting companies such as GE Water and GHD.

3.17. Additional information

The Commission encourages applicants to provide any additional information they consider would be of assistance in supporting the application. Please provide below.

4. FACTORS SPECIFIED IN THE ESSENTIAL SERVICES COMMISSION ACT 2002

In considering a licence application, the Commission must have as its primary objective the protection of the long term interests of consumers with respect to the price, quality and reliability of essential services, and must also have regard to the need to:

- a) promote competitive and fair market conduct;*
- b) prevent misuse of monopoly or market power;*
- c) facilitate entry into relevant markets;*
- d) promote economic efficiency;*
- e) ensure consumers benefit from competition and efficiency;*
- f) facilitate maintenance of the financial viability of regulated industries and the incentive for long term investment;*
- g) promote consistency in regulation with other jurisdictions.*

If the applicant believes that information about their application would assist the Commission in its consideration of these factors, the applicant should provide such information below.

As previously stated BHP Billiton and subsidiary companies operate within a set of charter values which govern how we operate our assets and interact with the communities in which we operate. The implementation of these values in our day to day operation results in the creation of a fair, respectful and efficient collaboration with our council partners.

5. APPLICATION FEES

Applicants for a licence must pay the Commission an application fee which is fixed by the Treasurer. Please enclose this fee with the application. An application cannot be considered until this fee has been received.

A Justice of the Peace for South Australia
Gwyneth Joy Crane JP # 31604

6. DECLARATION

All information in this application for the issue of a licence to authorise the provision of retail services in the water industry in South Australia must be verified by a Statutory Declaration of the applicant, in accordance with the provisions of the *Oaths Act 1936 (SA)*¹, stating that the information contained in the application is true and correct to the best of the applicant's knowledge, information and belief.

In conjunction with this declaration, evidence of the relevant authority of the declarant to sign on behalf of the applicant must also be provided to the Commission.²

Statutory Declaration

I DANIEL ROWLANDS

of BHP BILLITON OLYMPIC DAM

do solemnly and sincerely declare that the information contained in this Application for the issue of a licence to authorise the provision of retail services in the water industry in South Australia is true and correct to the best of my knowledge information and belief.

And I make this solemn declaration conscientiously believing the same to be true, and by virtue of the provisions of the *Oaths Act 1936*.

Date 10/5/13

Signature 

(Where the applicant is a body corporate, the declaration must be made by a person authorised by body corporate to sign on its behalf)

Declared at: OLYMPIC DAM this 10 day of MAY 2013

Before me: GAYLENE JOY CRANE

(Signature of Justice of the Peace or other person authorised under the *Oaths Act 1936*)
