

Good Morning

I reviewed the enquiry framework document this week and concurred with ESCOSA that Option 4 was best way forward. As below:

Option 4: adopt a lighter-handed approach, and harmonise between and within industries

I do not see need for a meeting, ESCOSA has listened to the earlier Local Government responses and this is reflected in the Framework proposed. The key issues were around multiple reporting requirements and a one size fits all annual report which could readily be reduced for Councils with low customer numbers. Minor retail arrangements and a solid track record of low complaints.

Kind Regards

Myles
