**ESCOSA Inquiry:-
Into the reliability and quality
Of electricity supply
On the Eyre Peninsula**

18/08/2017

Attention Nathan Petrus

Port Lincoln Tuna industry Solar PV - Smart Mini Grid/Virtual Net Metering

Eye Energy Systems, Flextronics and partners have continued to develop the concept with high level energy audits; data collection and modeling of industry Letter of Intent [LOI] participants since the concept was first announced.

The proposal, incorporating a cloud automation solution providing visibility and control of the flexible load and generation capabilities will facilitate industry driven Distributed Energy Resource Management Systems (DERMs), will enable local industry retail and network opportunities.

With DNSPs seeking load in the Port Lincoln area to improve reliability the proposal will contribute to the creative mix of options benefiting Eyre Peninsula's energy needs through Local Industry Dispatchable Energy Innovation and Capacity Building.

Yours Sincerely

Alfredo Nistico
Director
