PROJECT: CARRAPATEENA PROJECT

SUBJECT: ELECTRICITY TRANSMISSION CONNECTION TO CARRAPATEENA: RELIABILITY STANDARD

Dear Sir,

OZ Minerals refers to the letter received from the Essential Services Commission of South Australia (**ESCOSA**) regarding the construction of a new electricity substation at Mount Gunson South and the electricity transmission services to OZ Minerals Carrapateena Project.

In response to ESCOSA's letter, OZ Minerals makes the following comments:

1. OZ Minerals accepts the Category 1 reliability standard proposed by ElectraNet for the Mount Gunson South connection point, which will supply the Carrapateena mine site from May 2019.
2. The Category 1 reliability standard is consistent with the Transmission Connection Agreement between ElectraNet and OZ Minerals, in particular, ElectraNet's obligation to use its best endeavours to re-establish the connection after interruption.

Yours sincerely
