Dear Mr Wilson

Thank you for your correspondence dated 30 June 2020 regarding the proposed amendment to the Electricity Transmission Code for the new Davenport Mount Gunsen South 275kV connection point.

You advised that ElectraNet has proposed the application of the Category 1 standard for the permanent exit point as defined under clause 2.5 of the Electricity Transmission Code.

I understand that the OZ Minerals' Carrapateena and Prominent Hill mining operations are the only customers to be serviced by this exit point. The Office of the Technical Regulator in the Department for Energy and Mining has sought comment from OZ Minerals regarding the Category 1 standard. OZ Minerals has confirmed that the Category 1 standard remains acceptable and is consistent with the ElectraNet connection agreement.

Based on the information provided, I do not have any objections to the proposal.

If you have any queries, please do not hesitate to contact Mr Mark Burns of the Office of the Technical Regulator on (08) 8429 2707.

Yours sincerely

A handwritten signature in black ink, appearing to read 'Dan van Holst', written over a white background.

Hon Dan van Holst Pellekaan MP  
**MINISTER FOR ENERGY AND MINING**
