

My First reference is to Priority 9, Actions Column - Remove the words “where practicable, where it is reasonably practical to do so, will endeavour to, endeavour to”.

My second reference is to Priority 9, Measurable target column – “appropriately, and where it is reasonably practical to facilitate the request, Where possible, Where possible”.

If the department is really serious about access for all there is NOTHING in the policy that cannot be overcome, - otherwise the policy is just lip service and yet another Government grand cop out.

Let’s show some leadership.

E. Russell
