

To whom it may concern,

Compass Springs (Mount Compass Golf course estate)

As a new resident in this area I have real concern over the supply and cost of water provided by Robusto Investments. It appears that when ownership of this business was transferred some 4 years ago the original agreements regarding water supply were disregarded and now the present owner can do whatever [REDACTED] wants in this monopoly circumstance.

The residents here consist of many self-funded retirees as well as young families. We all need some assurance about the reliability and cost of future water supply.

The proposed charges suggested by Robusto are just not reasonable and obviously brought about by gross inefficiency or greed. Could we have some support to resolve this frightening worrying dilemma.

Yours Sincerely,

Trevor and Marlene Connor.
