Hi Simon,

EnergyAustralia welcomes the opportunity to provide feedback on the REPS reporting requirements.

We welcome the removal of the data reporting and the proposed reliance on Distributor and AEMO data to determine retailer liability under the scheme.

With regard to reporting on the 15 energy productivity activities – we note that this requires reporting *per activity*. For one out of our two providers, the price we pay for GJ's is based on the target/sub target for that activity i.e. *price per GJ* for each target. This means that procuring based on targets should be reflected; or alternatively we would need to convert these GJ to activity based reporting.

Overall, it may make more sense to report per GJ, however we expect that different retailers may have different arrangements and ESCOSA's reporting requirements should accommodate all those different arrangements.

If you have any questions in relation to this email, please feel free to contact me.

Regards  
Selena
