Dear Sir/Ma'am,

We are writing in response to your request for submissions with respect to the Water retail licence application - Cape Jaffa Anchorage Essential Services (CJAES). We were notified by CJAES of the application to cut the supply of potable water to the residents and commercial users of Cape Jaffa Anchorage (CJA) on 25 Nov 21.

The loss of a supply of potable water to CJA is a major concern to its residents. We do not have sufficient rainwater capacity to service our household on a permanent basis. Also, the house is not plumbed to give us the option of using non potable water for some functions (toilets, gardens, laundry, etc) and for the primary domestic requirements (cooking, drinking, washing, etc).

Clause 9.1 of the encumbrance identifies that the 'procurement (of) the availability of a) reticulated potable water and b) sewage discharge and effluent treatment' and further to that, clause 9.2 identifies that if the services are not available then 'reasonable endeavours to make them available again as soon as practicable'. We feel that this section is not being adhered to and thus this has been breached.

As such, we request that the Water retail licence application - Cape Jaffa Anchorage Essential Services proposal be denied. This action is not supported by my wife and I.

Kind Regards,

Trevor and Liz Baker
