**Subject:** Re: Stakeholder Update - Robusto Investments (trading as Compass Springs) Standard Customer Contract

Dear Sir/Madam

As a Stakeholder.

In response to your latest pricing determination effective July 2022 to June 2023, yes I see the prices have been reduced slightly, but still nowhere near the SA Water prices that my neighbors only 100 mts away and most of the rest of Mount Compass pay.

They receive a more consistent supply without the numerous cut offs that we endure. These cut offs have already cost me the need for a plumber to come at my expense because the residue pushed through the pipes when switched back on have prevented my tap seals being effective and allowed dripping and water wastage.

I object strongly to this still too high determination and ask you to review again these exorbitant prices for an inferior supply. I would be more understanding if we lived in the bush, but be fair, we are a southern suburb/township of Adelaide.

Trusting this does not go on deaf ears.

Yours  
Peter Birmingham
