Subject: Fw: Orroroo water quality project

The benefits of this pipeline will benefit not only residents but SA Water. The garden would just love this water when you use the current water in the summer on your garden it leaves salt residue and plants really struggle not to mention the fruit trees.

Many the time the only way to get water when the tanks are empty is to run it through the hot water system and there goes the hot water system and I just can not afford a new one as I only live on my pension.

We really depend on it to rain up here so it would be nice to know we can drink the water, I would drink this water.
