Subject: Orroroo Water upgrade

Dear ESCOSA

As residents of the Township of Orroroo , our response to the original survey as to whether we would drink the water was to say "NO" because, having tasted Adelaide water it still didn't match our rain water supply.

However having tasted Peterborough's water, we would definitely be happy to drink it and use it as our main source of water supply.

Good quality water not only benefits the town people and those on the land around but also the many tourists who call and stay in our town.

We believe that the poor response to the original survey came about because we having been trying to get a better quality of water for our town for the last sixteen years with little results.

Yours sincerely

John & Rita Cozens

PS As owners of the former Bank SA building, which only has Town water connected, it will be much easier to attract new tenants if the water quality is improved to that Peterborough standard.
