Subject: Orroroo water quality project

My husband a retired Plumber & now permanently in Hosp knew all about Orroroo's water & I've remembered from his teaching. The water being so hard & full of minerals, quickly wore out the taps, hot water service & undrinkable. He installed a water softener & even having that commodity was all but useless....H.W. system never saw out the 5 yr period of warrenty. the water caused the plants to burn & one needed to be very careful when watering with a sprinkler.

I previously lived in Pt Pirir & was familiar with S A Water supply there.

Orroroo may be a smallish country town but our needs are important.

Thankyou

Mrs. Margaret O'Loughlin
