Subject: Orroroo water quality project

Our quality of life would be greatly improved with potable water.
Not only would we be able to drink the water knowing that it is safe to do so.
Tourists travelling through our area would be able to "top up" their water tanks
On their caravans, with no nasty surprises when they go to use it.
Tourism may also flourish in our area because of a better quality.
Word soon travels and I am sure that some people avoid coming to our town
Because of the water quality.
We as townsfolk would be able to grow different varieties of plants in the garden –
One's that we don't have to worry about the salty inferior water.
We will not have the added costs of corroded pipes, taps,
and hot water systems –
Nor the cost of rain water tanks.
Overall life would be a whole lot better.

Kay Parkyn
Orroroo
