Subject: Orroroo water quality project

To Whom It May Concern,

As a resident of Orroroo, I'm writing to express my concern regarding the town's water quality. For as long as I can recall, Orroroo's water quality has been extremely poor - for drinking and other purposes including gardening and washing machinery. Many plants have failed to survive due to the lack of quality water available, and cars can no longer be washed with the town water.

As a small country community, we would benefit from improved water for our household purposes, but also as a community. Orroroo is reliant upon tourism and aims to increase its population and visitor numbers. Quality water would help this, particularly considering our ageing population. If the pipeline were to go ahead, it should benefit both the Orroroo community and SA Water.
