Subject: Orroroo Water Quality Project

TO WHOM IT MAY CONCERN

As a small business owner in the township of Orroroo, I would like to confirm my support on improving the water Quality to the Orroroo Township.

My wife and I own and operate a small metal fabrication business in the Orroroo Township. Our business uses a significant amount of water for our the businesses operations eg washing equipment like vehicles, plants, fuel tanks and water for concreting and oxy cutting and cooling etc.

We are currently using the majority of our water as rainwater primary due the quality of the mains water.

If improved water was available to our business we would change over entirely over to the main water.

The availability of good quality mains water would enable us to operate more cost efficient as the internal infrastructure is already in place, but unable to use, we are using alternative plumbing and pipework for the accessibility to the rainwater.

Also the improved water supply would not only benefit our business but make the township more attractive to other businesses and resident to invest and build, as water access is available and could potentially increase the no of properties connected.

This would also justify SA Water's charges to the connectors, as they will be getting the same quality as everyone else and paying the same amount.

Thank you for consideration.
