Subject: ORROROO WATER QUALITY PROJECT

This in regards to the water quality in Orroroo.I have worked in this town for 40 plus years as the town electrician and have had to repair hotwater systems with a bucket full of scale in when you replace the elements and they will only last for 4 to 5 years with this water but with rain water would last twenty plus years. In the last 7 years i have worked as the maintenance officer at the Orroroo Hospital and have seen the damage the town water is doing destroying our Hot Water Systems,taps,pumps,pipes,and plant.

The water is very bad and is a big problem to the town and i think it is getting worse .

I would be happy to meet with anybody about this water as with 40 plus years dealing with the water we need to fix this problem.

Regards Robert Wilson

ORROROO
