I want the South Australian Government to ensure a fair price for the power solar households and small businesses generate in SA.

I call for the South Australian Government to legislate a fair feed-in tariff for all solar owners.

Retailers should not be allowed to set their own tariffs. There should be regulated feed-in tariff premiums in SA. The evidence in NSW shows that deregulation results in the industry taking advantage of the individual householders and small businesses who have taken the step towards greening SA and invested in solar panels.

I want the South Australian Government to ensure a fair price for the power solar households and small businesses generate in SA.

I call for the South Australian Government to legislate a fair feed-in tariff for all solar owners.

Retailers should not be allowed to set their own tariffs. There should be regulated feed-in tariff premiums in SA. The evidence in NSW shows that deregulated feed-in tariffs reduce choice for consumers and competition between retailers - leaving consumers at the mercy of retailers.

South Australia has already established a place as the leading solar state in Australia. Please ensure all solar owners in South Australia get a fair go.

Sincerely,
