

2.

Whilst supporting the current level of regulation, we do have some concerns about maintenance of and upgrades to existing Port Pirie port infrastructure. There is a risk of reduced maintenance and upgrade work at Port Pirie by the port operator, which could lead to the gradual deterioration of infrastructure over time. To some extent we have already seen this occur. To support the efficient movement of cargo, we would like to see ESCOSA ensure that regional ports are maintained and serviced to the same standards as Port Adelaide.

As a sizeable user of port services, we are grateful for the opportunity to present our views in this review process. If you do require any further feedback, do not hesitate to contact me.

Yours sincerely
